AMULET LAUNCHES NEW GENERATION OF TRANSPARENT ARMOR FOR OFFICE ENVIRONMENTS - AMULET TA™

Amulet Protective Technologies, Inc. introduces new transparent armor technology to commercial office environments.

Ultra-light in weight and superior in clarity, Amulet Transparent Armor - AMULET TA - maintains the aesthetic of the modern workplace by transforming glass-walled offices and conference rooms into safe-rooms capable of protecting life during an Active Shooter event.

Glass structures common to the office environment can now also serve as state-of-the-art safe-rooms that reside immediately in the occupied space. Office personnel can now be well protected from handgun, rifle fire, and blast, should the unthinkable happen.

Amulet TA is also available with a feature that provides instant concealment, transforming the glass surface from completely clear to opaque with the touch of a button.

AMULET TA™ - Private Offices and Conference Rooms can now also serve as Saferooms.
