## Amulet® Ballistic Mobile Board

The Amulet® Ballistic Mobile Board combines an award winning ballistic barrier technology by Amulet® with Egan Visual's proprietary EVS Technology™ writing surface. The Amulet® Ballistic Mobile Board is embedded with NIJ Level IIIA Technology, rigorously tested to meet industry standards for ballistic resistance. The mobile presentation board is designed for easy installation and deployment. It is portable, facilitating quick movement and setup.

This mobile board is designed for use in high-security settings such as airports, government facilities, corporate settings, schools, and stadiums, where safety is paramount bringing a higher level of safety and security to your environment.

### Technical Specifications

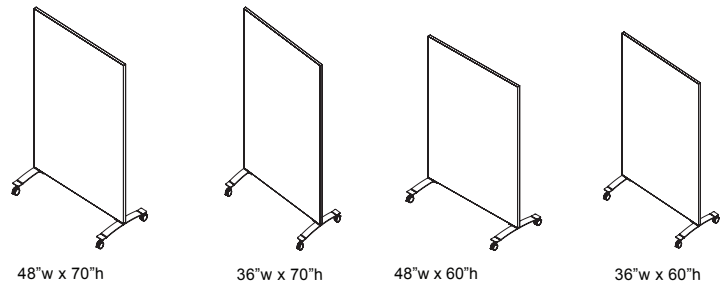

- Easy to move and transport
- Ballistic performance level UL752/Level 3 and NIJ standard 0108.01 Level IIIA
- Equipped with swivel casters with total lock mechanism
- Amulet Ballistic Barriers® is non-toxic and sustainable
- Serves as a fully functional mobile whiteboard featuring EVS Technology™
- Available in four standard sizes
- Option to include acoustic or tackable fabric materials

### EVS Technology™ Writing Surface

EVS Technology™ offers an anti-glare surface for enhanced visibility from different angles regardless of lighting conditions. It also features an antimicrobial coating to reduce the spread of germs. This specially designed surface is guaranteed to clean permanent stains, restoring it back to its original bright white surface.

## Dimensions

## Infill Option

One side of the mobile board will consistently feature an EVS Technology™ writing surface.

For the reverse side, there is flexibility to opt for either EVS™ acoustic or tackable panel.
