

# AMULET RECEPTION

## FRONT-LINE PROTECTION FOR THE FRONT OFFICE

Reception is where first impressions are typically made and where first contact often occurs entering a facility. Keeping front office personnel safe from harm during an Active Shooter event can be challenging, but with **Amulet®Ballistic Barriers** it is possible.

**Reception** and **Information** stations can now provide the same level of ballistic protection found within today's most advanced saferooms thanks to Amulet technology. **Amulet®Ballistic Barriers** are thin in profile and light in weight, making them uniquely compatible with these structures. Protecting life invisibly while hidden within.

Amulet has teamed with several leading manufacturers who produce some of the most beautiful furniture products. The result is Reception, Information and other furnishings now with **Amulet®Ballistic Barriers** built in.

There are also many options:

- **Amulet TA™** - Transparent Armor can be applied to the work surface to protect staff while still providing visibility and conversation
- **Amulet Intercept™** ballistic detection system available - Panic Button available for staff to reach to help before the danger even enters the building
- **Retrofit** – Amulet can be hidden within existing Reception/Information structures

Amulet contract furniture products are available in a variety of configurations, finishes, and surface options. Furniture product containing Amulet technology serve as a life-safety 'device' and viewed as capital equipment. As such, purchase may also be tax deductible (refer to federal tax guidelines).
